Short Term Accessibility - Start Here

Where do I get started with accessible eBooks? We can help.

There are many things you are already doing that you can translate now into essential documents that will help your press engage with accessibility. In the short term this will enable you to communicate with readers and libraries about accessibility, who only need to know what you are currently doing and plan to address in the future.

Our recommended short term activities are:

1. Determine whether legislation applies to the press
2. Complete a VPAT
3. Publish an accessibility statement

That's it! Knowing your books already means you already have everything you need to complete these tasks. All you have to do is assign someone to complete this work and then read our quick guidance in the rest of this section, linked to in the numbered points above.
